#### **Statoil’s spar platform Aasta Hansten floated onto M.V Dockwise Vanguard**

For this float-on operation the Engineering Team within the Offshore Energy division of Boskalis have used **GHS** to prepare each step of the ballast procedure in the office and obtain client\marine warranty surveyor approval for stability compliance throughout the operation. Our Ballast Engineer used GHS on-site to support the crew during the ballast operation. The master of the M.V. Dockwise Vanguard uses GHS as a Class Approved Loading Computer for vessel operations.

Ian Emery, (Information Coordinator), Dockwise/ Boskalis, very explicitly says “GHS supports Boskalis’s Engineering Team in designing safe operations”.

## GHS

Leading PC-based hydrostatics & Stability software since 1972, GHS performs the most complex calculations, runs seamlessly intact, damaged, probabilistic stability, and longitudinal strength calculations, and is constantly being extended and improved to meet the increasing sophistication and complexity of stability standards and to ensure continued leadership and excellence.

GHS is well-proven, reliable, is in constant use by major design firms and shipyards worldwide, and well accepted by all Regulatory agencies: used by ABS, and formally approved by LR and DNV-GL, GHS is distributed in Europe by NDAR / Design Systems & Technologies.

## NDAR

In operation since 1988, NDAR offers a full range of synergetic Naval Architecture, Design, Production and PLM software, such as ShipConstructor, Rhino3D and its Naval Architecture plug-in Orca3D, GHS, MAESTRO, ShipWeight, AutoFEM, etc. NDAR provides naval architecture & marine engineering services, too. The range of expertise offered by NDAR and its industry partners covers the full ship, yacht and offshore industry spectrum.

## BOSKALIS

Royal Boskalis Westminster N.V. is a leading global dredging and offshore contractor and maritime services provider. We offer a unique combination of experts, vessels and activities. With our origins in the Netherlands, we have been operating for over 100 years. Today we create new horizons for our stakeholders in the ports, offshore energy, maritime and inland infrastructure markets.
