

# HydroComp, Inc. NavCad Training Seminar

10 March 2006 in London

Conveniently scheduled after  
the WMTC2006 Conference

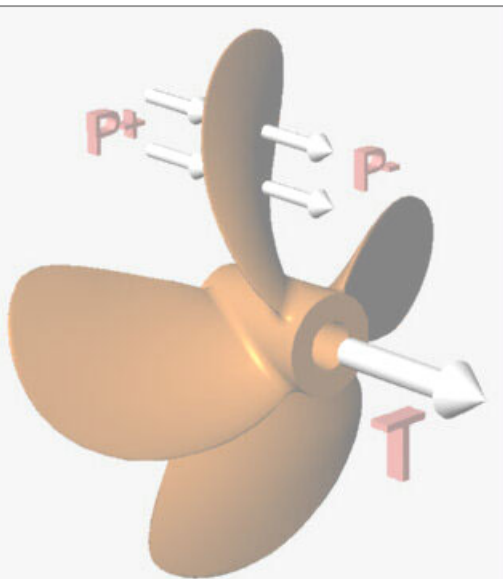

HydroComp will be holding a one-day NavCad training seminar on Friday 10 March 2006. For the convenience of participants, this seminar will be held in London the day after the closing of the 2006 World Maritime Technology Conference.

The NavCad™ software provides marine designers and other professionals with the tools necessary for the prediction and analysis of vessel speed and power performance. It also provides for the selection of suitable propulsion system components – engines, gears, and propulsors. This seminar will train users in the operation of the software and teach strategies necessary to maximize your use of NavCad.

**This seminar is suitable for both new and experienced users of NavCad**, as well as for anyone interested in learning resistance prediction and propulsion analysis. This event will be particularly valuable for naval architects and marine engineers from shipyards, design consultancies, navies, research institutions, and propulsion equipment manufacturers. Existing NavCad users will take away increased knowledge and efficiency, as well as an introduction to valuable under-utilized features.

Donald MacPherson, HydroComp's Technical Director, will once again be personally conducting this seminar. Donald is internationally known as an expert in the performance prediction of propulsors and marine vehicles, and is a highly requested speaker for training seminars and conferences. (In fact, Donald is presenting a paper about propeller cavitation the preceding day at the WMTC2006.)

## ***Why should I attend the training seminar?***

If you run NavCad, or are considering the purchase of NavCad, do not miss this seminar. As one participant noted,

*“Don is about as good as it gets in this field and I learned a lot. This software will help me in my future design work, and I will definitely be sending some of my people to future sessions.”*

## ***Don't miss out!***

To register, just fill in the attached form and fax it back to us. For more information, please call (603)868-3344, email us at [sales@hydrocompinc.com](mailto:sales@hydrocompinc.com), or visit the seminar page online at [www.hydrocompinc.com](http://www.hydrocompinc.com). **Enrollment is limited – don't delay.**

***See you in London!***

## Seminar topics include:

- **Introduction to NavCad 2006**
- User interface features
- NavCad project management
- Hull and propulsor performance methodologies
- Resistance prediction
- Propulsion analysis
- Propeller sizing
- Supplemental calculations (trim, squat)
- **New, advanced and under-utilized features**
- Incorporating model test and sea trial data
- Customizing NavCad
- Using the data libraries
- Tutorial and case studies
- **An opportunity for user-to-developer feedback and comments**

## You will receive a seminar workbook with over 100 pages of resources, including:

- Presentation notes
- HydroComp technical reports about prediction techniques, propeller performance and vessel operation
- HydroComp publications about sea trial analysis, waterjet performance, engine operation, and other subjects

## Location and schedule:

The training seminar will be held in the Weir Lecture Hall at the offices of the Royal Institution of Naval Architects (RINA) at 10 Upper Belgrave Street, London ([www.rina.org.uk](http://www.rina.org.uk)). The seminar will run from 8:30a to 5:00p on Friday 10 March 2006. Lunch will be provided.

## What to bring:

To take full advantage of the seminar, participants should bring a laptop computer. Also, bring any projects that you would like to discuss.

## Cost and Registration:

The cost for the seminar is US\$575 per person. Discounts are available for multiple participants from the same company.

To register, please fill in the attached form and fax it to (603)868-3366.

***Space is limited. Reserve your spot today.***
